

Artseed: an art journaling app

*For each piece, plant seeds and grow them
through guided reflections*

Opening the app...

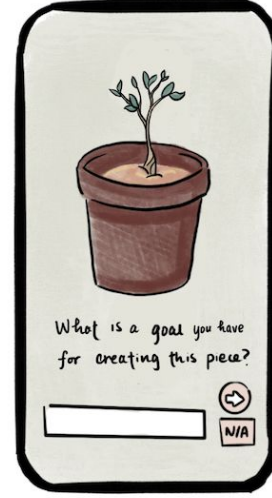

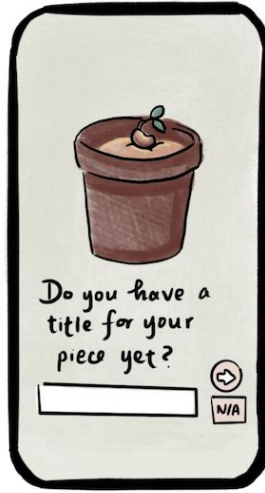

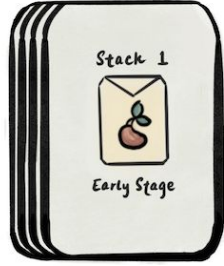

Welcome to the homescreen! There are 3 panels:

- 1) **Plant a new seed:** start a new entry by clicking this.
- 2) **Explore the library:** explore question stacks, seed packets, and question cards created by other users, as well as create your own
- 3) **Gallery:** view all the pieces you have entered into this app in gallery format

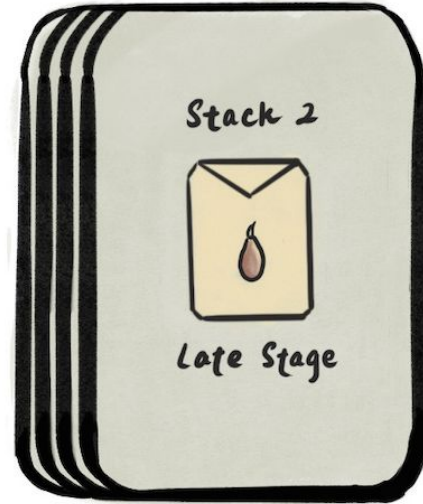

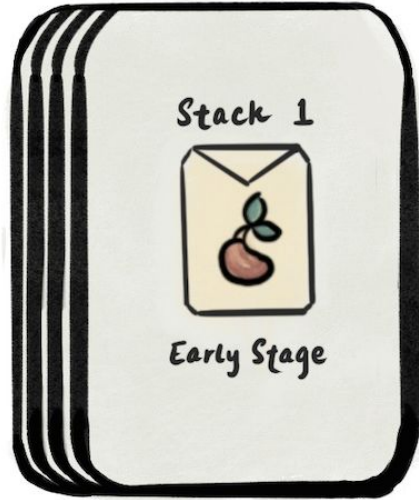

When planting a new seed, select the question stack most relevant to you depending on where you are in your creative process

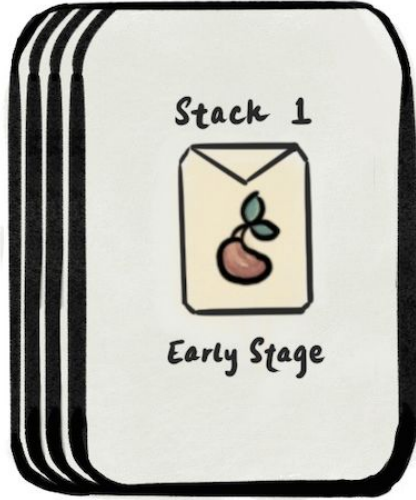

For example, stack 1 is tailored for users early on in their creative process – encouraging them to flesh out their ideas, set goals, etc.

The app comes equipped with numerous pre-made sets. However, users are able to customize and create their own sets as well.

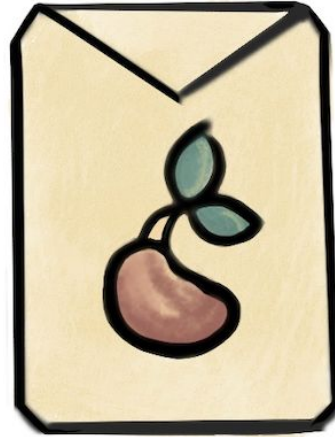

Each question stack is composed of a seed packet and question cards.

Users are able to customize and create their own stacks, packets, and cards as well as share them with other users through the library (think of the gallery in note taking apps where users share notebook page templates, schedule templates, calendar templates, and so on).

Question cards

Let's say we click on **plant a new seed** and select *stack 1*

Do you have a title for your piece yet?

N/A

Did something (an idea, a thought, an image) inspire this piece?

N/A

What is a goal you have for creating this piece?

N/A

What is one thing (i.e. conveying a message, refining a skill...) you hope to accomplish?

N/A

- Use the textbox to enter your reflection
- Use the next button to skip this question for now and revisit it later
- Use the N/A button if this question is not relevant for the piece you are working on

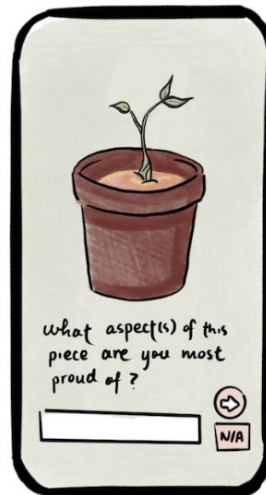

Upon completion of the stack...

We are asked to add a picture of our piece to our gallery

Use your phone camera to take a picture of your piece, documenting your current progress

Some time has passed and we have made substantial progress in our piece...

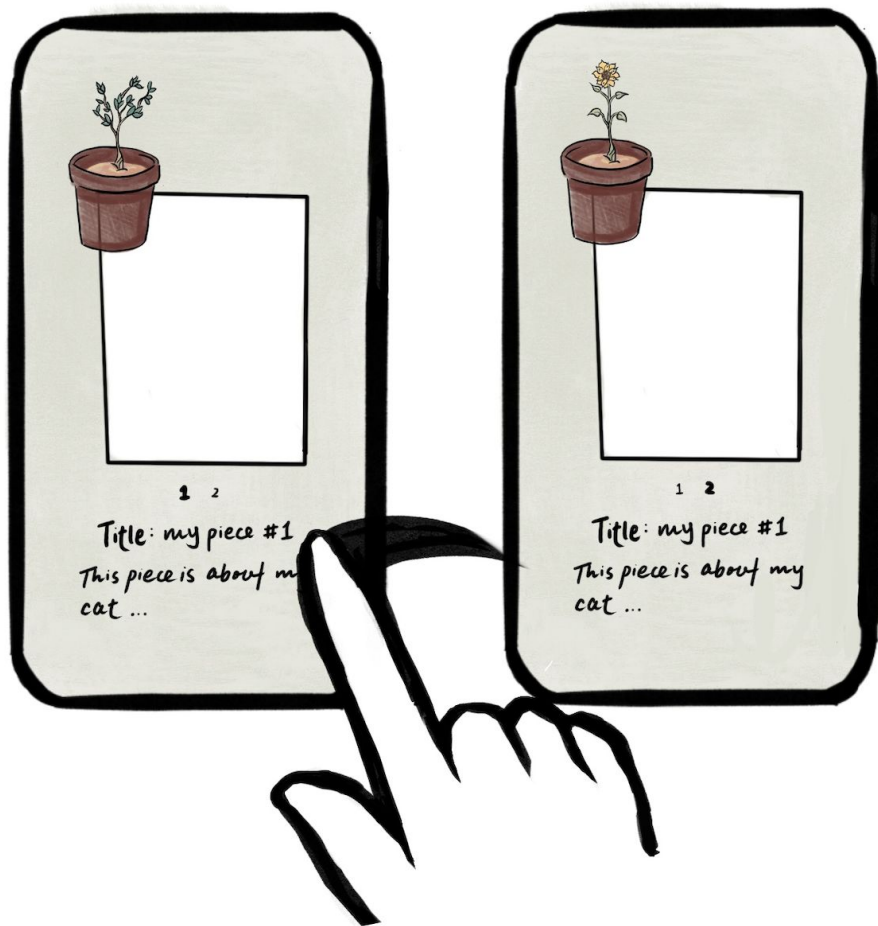

Let us now work on stack 2:

Upon completion of the stack...

Once again, snap a picture of your piece

Viewing our piece in gallery

Swipe to see your two plants
as well as your progress
photos!

Questions for the user

- Is the interface intuitive to use? Why or why not?
 - What challenges did you encounter when using the interface?
- Are the guided reflection questions helpful? Do you have any suggestions for better questions we should be asking?
 - Did the questions feel appropriate for the seed pack they were assigned to? (early stage, late stage)
- Does the plant metaphor add to your experience using this platform? Why or why not?
 - Did you feel encouraged to complete more questions in order to grow your plant?
- What features do you like/dislike?
